

Make Me Admin 2.0

User Manual

Launch Make Me Admin from the Start menu. It is located under **All Programs | Sinclair Community College | Make Me Admin**.

When the application launches, it will determine whether you already have administrator rights. If you do not, the Grant Me Administrator Rights button will be enabled. If you do already have administrator rights, the button will be disabled, and it will indicate that you already have administrator rights.

When you click the Grant Me Administrator Rights button, the application will attempt to add you to the Administrators group on your computer. If this process is successful, the application window will disappear, and a new icon will be added to the notification area on the taskbar, near the date and time. A popup message will appear for a few seconds, indicating that you have been added to the Administrators group.

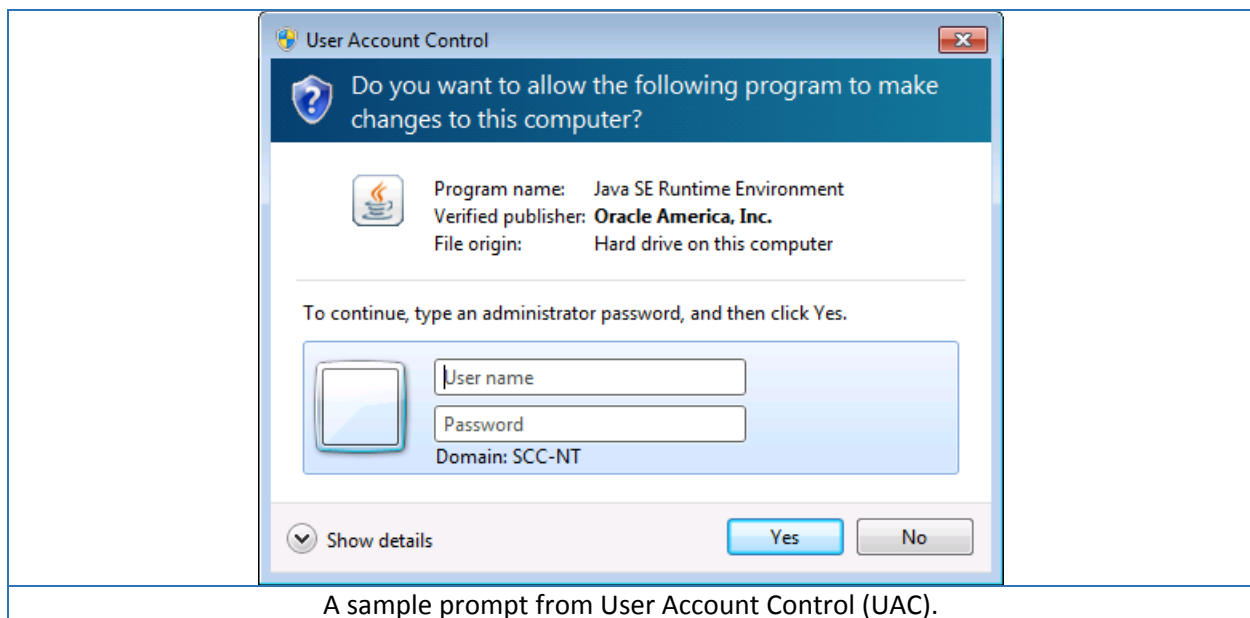

This icon will remain in the notification area as long as your administrator rights are active.

It is at this point that you should perform the task(s) that require administrator privileges: changing computer settings, installing or updating software, etc.

Note: You do not need to log off and on in order for your administrator rights to take effect.

If you receive a prompt from User Account Control, similar to the figure below, simply enter your current user name and password.

After a number of minutes, your rights will expire. The application will display one final popup message, and then close completely.
